Dear Colleague,

With only a few weeks to go until the second Tight Oil Water Management Congress 2012, returning to Denver, Colorado, on October 29 - 30, this is the last opportunity to register your place and be part of the second in the Tight Oil Water Management Series and sixth in the sell-out North American Water Management Series - attended by over 2,000 delegates and speakers from almost every major unconventional operator in the USA and Canada.

The 2-day congress will look at managing flowback and produced water in the Bakken, Niobrara, Eagle Ford and Permian with a focus on driving down the cost per barrel of treatment, sourcing and logistics; and learning how to re-use after treatment to minimize scaling risk and optimize frac fluid effectiveness.

Who's Attending This Year's Congress?

Rockwater Energy, Schlumberger Water Services, Bain & Company, Shell E&P Co, Logic Energy Solutions, Victaulic, LBG Recycling Services LLC, Water Trac, Big Horn Energy Services, Tetra Tech, Statoil ASA, AmeriQuest Transportation Services, Key Energy Services, Oasis Petroleum, RN Industries Trucking Inc, Trihydro Corporation, Environmental Defense Fund, Liberty Resources LLC, Utica Ohio Project, Environmental Defense Fund, Basic Energy Services, Big Horn Energy Services, Enhance Co, Inc, Foreland Operating, Laredo Petroleum, Genivar Inc, KC Harvey Environmental LLC, Statoil Canada Ltd, Crescent Point Energy, IDEX, ChemTreat, Laredo Petroleum, Hunt Oil Company, Big Horn Energy Services, Quicksilver Resources Inc, TETRA Technologies Inc, Energy Rocky, Mountain LLC, TrueNorth Steel, Encana Oil & Gas, U.S EPA, Liberty Resources LLC, Waste Management, Kraton Polymers, PackersPlus Energy Services, Gold Spur Trucking, Crescent Point Energy, IDEX, Southwestern Energy, AquaMost, WPX, EnCap Flatrock Midstream, and many more...

This year's fresh agenda welcomes Timothy Cheung, Production Chemist from Shell on Day 1, who will address treatment requirements and identify the recycling and treatment criteria that must be met to avoid scaling and enable successful re-use.

Day 2 will further explore How The Restrictions Set By Federal And State Governments On Disposing Of Flowback And Produced Water Could Impact Decisions On Waste Management. Join the break out session where Karl Rockeman, Program Manager of the North Dakota Department Of Health-Waste

Water will be speaking on surface water disposal regulations to have an in-depth understanding of the different requirements.

More New Features For 2012 Congress Include:

Water Economics Break Down: Hear an entire presentation on how to optimize the economics of water management, when treatment is feasible and areas where costs can be reduced

Increased Frac Fluid Compatibility Focus: Learning not only how to treat water but how to ensure it optimizes production when pumped back down the well

Underground Injection: Assessing not only the disposal wells currently available but also the economic and geological viability of drilling new disposal wells in the formation

Updated Regulation Streams: Hear the very latest changes in regulations on water sourcing, disposal and transport specific to your area of production: Denver, Texas & North Dakota

GROUP BOOKING DISCOUNTS - BRING A COLLEAGUE!

Register a group with the following discounts:

2+ Delegates 10% OFF

3+ Delegates 15% OFF

 4+ Delegates 20% OFF

*Please note this special offer does not apply to existing bookings, new registrations only. Must register delegate places at the same time to receive this discounted rate, terms & conditions apply. Quote 'TOWM GRP'.
